REOPENING PLAN FOR THE SAGAPONACK COMMMON SCHOOL DISTRICT

I. Our Little Red School House

The Sagaponack School is one of the last remaining one-room school houses in New York State. Although our facility is small in size, we offer a full instructional program for children in grades K-3. This year our student enrollment totals 13 students across those four grade levels. We offer our families the opportunity for their pre-school children to attend one of two area pre-school programs. When our students complete 3rd grade, they are then able to select from one of three area school districts to continue their education through graduation at the end of 12th grade.

This plan includes the above information so that the reader may gain a better understanding of who we are and how we plan to address the challenges that have been brought on by the Novel Corona Virus (COVID-19). To say that we are unique would be an understatement. While being small can be a positive, it can also expose many additional challenges that larger school districts are in a better position to handle.

However, in the 2021-2022 school year, we are confident that we can make the necessary adjustments so our students can succeed in this ever-changing environment. We met the challenges of 2020 with a high degree of success as our staff quickly moved to a virtual model when the governor's order was issued to close schools across the state in mid-March 2020. We lost little time in moving to an instructional model that featured real-time instruction via SKYPE software. Our parents stepped up as well, working with their children to ensure that homework and assignments were completed. In the 2020-2021 school year students remained in-person in the classroom throughout the school year. Our goal is to remain in-person for the 2021-2022 school year.

II. The Role of Our Shared Decision-Making Committee (SDMC)

The SDMC is comprised of two teachers, a parent of a resident student, a parent of a non-resident student, a member of the

community, and the superintendent/principal. One of the key functions of the SDMC is to serve as a communicator, a voice for the constituents they represent. To this point, the members of the SDMC have reviewed this document and have added their comments and suggestions as they framed their work with their constituents kept in mind. This Reopening Plan will be approved by the Sagaponack Board of Trustees at an upcoming Board meeting.

III. Designated COVID-19 Coordinator

Superintendent/Principal: The Superintendent/Principal of Sagaponack School will serve as the coordinator of the reopening plan with assistance from the Secretary to the Superintendent/District Clerk.

- IV. **Communication Plan** (Information to be posted in other languages as necessary.)
 - A. **District Website:** Once this plan is completed and submitted to NYSED for approval, it will be posted on the district's website.
 - B. **Remind Me App:** Over the years, we have successfully used the Remind Me App to notify parents and staff of emergency school closings, school events, etc. This useful and reliable App will continue to be used as we work through the coming school year.
 - C. **Emails:** The use of emails has been a dependable method for us to provide detailed messages and information to our parents. This will continue.
 - D. Building Signage: (See Appendix A)
 - 1. Topics to include:
 - a. Hand hygiene
 - b. Social distancing
 - c. Wearing proper face coverings/masks
 - d. Respiratory hygiene
 - e. Use of PPE (personal protective equipment)

V. Training for Both Staff and Students

A. Staff will participate in professional development that addresses the following topics:

- 1. **Hand Hygiene:** Teach and reinforce handwashing with soap and water for at least 20 seconds. Increase monitoring as needed to ensure adherence among students and staff
- 2. **Social Distancing:** Maintain at least three feet apart; wear a mask at all times in the building. Six feet during snack and lunch.
- 3. Wearing Proper Face Coverings/Masks: Surgical style masks, KN95, N95 or cloth coverings are acceptable. Must cover both the nose and the mouth. In some cases, a face shield that also has a mask attached to it may be used so that students can "see the teacher talking" to them. This is important for use in a related services class-Speech/Language. New York State Department of Health guidance states that face coverings are required at all times in indoor school facilities, except for meals. For outdoor settings, effective June 7, 2021, face masks are not required to be worn outdoors on school grounds.
- 4. **Respiratory Hygiene:** Encourage staff and students to cover coughs and sneezes with tissues or the corner of an elbow. Used tissues should be thrown in the trash and hands washed immediately with soap and water for at least 20 seconds. If soap and water are not readily available, the use of a hand sanitizer that contains at least 60% alcohol may be used.
- 5. **Signs of the Illness:** Symptoms associated with the COVID-19 are as follows:

Most Common:

Fever, dry cough, tiredness

Less Common:

Aches and pains, sore throat, diarrhea, conjunctivitis, headache, loss of taste and smell, rash on skin, or discoloration of fingers or toes

Serious:

Difficulty breathing or shortness of breath, chest pain or pressure, loss of speech or movement

B. Students will receive regular instruction in the above topics as well. (See Appendix B: Signs of Illness)

VI. School Building Capacity

- A. Square Footage of Classrooms at the Sagaponack School
 - 1. When the partition is in the open position and we measure from wall to wall, the open space totals approximately 1,350 sq ft.
 - 2. Social distancing requires three feet between each other and the wearing of a mask. Individuals must wear acceptable masks inside the school building and at all times on school buses. Members of the school community do not need to wear masks when eating, drinking, singing, or playing a wind instrument. When masks are removed for these purposes, individuals must be spaced six feet apart.
- 3. In general, people do not need to wear masks when they are outdoors (e.g., participating in outdoor play, recess, and physical education activities).

VII. Enrollment Projections

- A. When the 2020-21 school year closed in June, our enrollment total was 16 students.
- B. At the same time, we projected that our enrollment for the 2021-22 school year would be 17 students.
- C. As of August 11, 2021, our potential enrollment was 15.

VIII. We May Need Additional Space

A. If our enrollment of 13 students increases and the addition of 5-8 staff members on a daily basis, it is possible that providing instruction for all at one time in the Sagaponack School building will not successfully meet social distancing and health and safety protocol requirements. To prepare for this possibility, we may have to once again use the offsite classroom space located at Most Holy Trinity Church on Meadow Way in East Hampton for our students in kindergarten and first grade.

IX. Instructional Formats for our Continuity for Learning Program

- A. The teaching staff will continue to follow the approved NYS Learning Standards across the curriculum areas.
 - 1. **In-Person**: This is the program that existed before schools were ordered closed by Governor Andrew Cuomo in mid-March 2020 due to COVID-19. Depending upon actual enrollment, this program could be offered in the Little Red School House as we have known

it to be over the years, or in an alternate site. If enrollment increases our 2nd and 3rd grade students and the teacher of record, along with a teacher aid will remain in the Sagaponack School for in-person instruction every day. They will follow the regular daily program, complete with special area subjects (art, music, technology, physical education and Spanish). Concurrently, our Kindergarten and 1st grade students along with the teacher of record and the teacher aid, will be moved to the classroom at the Most Holy Trinity building in East Hampton. They, as well, will follow the regular daily program, complete with special area subjects (art, music, technology, physical education, and Spanish).

2. Virtual: If we are directed to or decide to close our school due to an increase in the COVID-19 infection rate, we will move to an allvirtual instructional model using Google Classroom to deliver instruction for our students. We are confident that we can use this model if we are directed to or we decide to close our school. Students can expect substantive daily interaction with their teachers when receiving instruction in a virtual format.

X. Staffing and Human Resources

A. **Classroom Teachers:** We realize that if our enrollment continues to grow, the need to add classroom teachers may become a reality. However, at this time, we are not in a position to take this action.

XI. Transportation

- A. Inter Municipal Agreement: Our student transportation is provided through an Inter Municipal Agreement (IMA) with the Sag Harbor UFSD. They handle our in-district transportation, transportation to our receiving schools and parochial/private school transportation. We do not hold before or after school co-curricular activities.
- B. The following represents various protocols that the Sag Harbor transportation department will follow during the 2021-22 school year as per their Reopening Plan:
 - 1. Routing to Ensure Social Distancing: One of the primary areas of focus is ensuring students and staff can socially distance while on the bus. This may require re-routing the bus routes and adding additional bus stops.

- 2 . **Personal Protective Equipment:** Drivers will wear face coverings while on duty.
- 3. Sanitizing School Buses: Disinfectant wipes will be provided to each bus so that they can be wiped down during and between bus runs. The buses will also be equipped with gloves, sanitation spray, and towels for deep cleaning after each morning and afternoon run.
- 4 . Social Distancing and Personal Protective Equipment: Students will be instructed to wear masks at all times while on the school bus and reminded of the proper use of face coverings and social distancing. Students will be encouraged to bring their own face covering. However, if they forget their face covering, the bus monitor will give the child(ren) a face covering. Students will be assigned seats in order to maintain social distancing. Assignments will be limited to one per seat unless a sibling is riding the bus to and from school.

XII. Arrival Protocols for Staff

- A. **Protocols:** Before leaving for school each morning, each staff member should take their own temperature. If their temperature is 100 degrees F or higher, they should not come to school that day, monitor their health throughout the day, and consult their healthcare provider as necessary.
- B. As an added step in our arrival protocol, each staff member will have their temperature scanned. If the temperature is 100 degrees F or above, the individual will be directed to a designated area of the school, settle in, and wait for a second temp check to be administered within the hour. If after the second temp check the temperature is still at 100 degrees F or above, the individual will be directed to return to their home and consult with a healthcare provider as necessary.
- C. Each staff member will enter their information onto a weekly log. (The actual temperature will not be recorded.) (See Appendix C: Temp Check/Screening Log for Staff)

XIII. Arrival Protocols for Parents/Visitors/Vendors/Guests

All parents, visitors, vendors, and guests will follow the same protocols as indicated in Section XII. upon arrival at the school. Access to the

school will be on a limited basis. Deliveries should be dropped off in a box left on the porch outside of the secretary's office. The secretary will retrieve the item once the person has left the area.

XIV. Arrival and Dismissal Protocols for Students

A. Arrival Protocols

- Prior to leaving for school each morning, parents will conduct a temp-check of their children. If the temperature is 100 degrees F or above, the child should not come to school that morning. Essentially, if a child is not feeling well, parents should not send them to school and should consult with their healthcare provider as necessary.
- 2. As an added step, prior to exiting the school bus or their family vehicle each morning, children will participate in a temp check procedure. If a temperature is 100 degrees F or above, the child will be directed to a designated area of the school where they can settle in and have a second Temp Check administered within the hour. If the temperature is still 100 degrees F or above, the child's parents will be contacted and directed to come to the school to take their child home and consult with their healthcare provider as necessary.
- 3. A daily log will be kept. (The actual temperature will not be recorded.) (See Appendix D: Daily Temp Check Log for Students)
- 4. Once a child clears the temp check procedure, they will enter the school building and follow social distancing protocols.
- 5. If a parent attests that their child has been in close contact with anyone who has been diagnosed with COVID-19 within the last 10 days, they shall notify the school immediately and keep their child at home. The child may return to school after having a negative COVID-19 test and the school has been notified with proper documentation.
- B. **Dismissal Protocols:** Teachers will organize dismissal using social distancing lines/markings as students prepare to exit the school and onto buses or to parents' vehicles.

XV. Snacks and Lunch

A. **Lunch Program:** We do not operate a lunch program, nor do we have students who are eligible for free and reduced-priced meals. Students

- bring food items from home as we do schedule daily snack and lunch times. All snack and lunch activities will take place either at individual student desks or at tables where six-six feet of physical distancing can be maintained.
- B. **Food Allergies:** Over the years, we have had experience with children who have food allergies. We will continue to accommodate these students as we are informed of their respective allergies.
- C. **No Sharing of Food:** This will be a major theme as well. It's a topic that will be on the staff's professional development agenda as well as regular reinforcement with students.
- D. Hand-Washing Hygiene: Proper hand-washing hygiene will be the subject of training for staff and students alike. At various times during the school day, staff will direct students to line up as per social distancing floor markings and await their turn at the sink to properly wash their hands. An extra focus will be placed on this activity because it has been identified as one of the most important ways to address the potential impact of COVID-19, along with social distancing and facial coverings/masks.

XVI. Recess

- A. Recess will be scheduled at various times during the school day. Whenever possible, recess will be take place outside so that students and staff will be able to enjoy the fresh air. When scheduled, selected students will be directed by staff to first access their coats (if needed) and then line up on the social distancing floor markings. Students and staff will be wearing their masks while they are in line and moving outside. Once outside, students may remove their masks. If they wish to wear them, they can keep them on and access various playground equipment while also staying six feet apart from other students.
- B. During inclement weather, when going outside is not an option, staff will make various activities available for student participation. The use of face coverings/masks, and social distancing requirements will be followed.

XVII. Social-Emotional Well-Being

A. Guidance Plan and BOCES: Last school year we implemented our state-mandated guidance plan. In addition to the various social

emotional learning (SEL) activities that our staff implemented with our students, a certified guidance counselor visited with us to conduct SEL type activities. Several of these activities may be provided during a school closure period, if necessary, via GoToMeeting or Zoom. We have contracted with Eastern Suffolk BOCES once again to provide these activities during 2021-22.

- B. **Part-Time Psychologist:** We have been fortunate to secure the services of a certified part-time psychologist who assists us with meeting the needs of students who experience social-emotional issues. We are pleased that he will continue his relationship with us for the 2021-22 school year.
- C. Professional Development: We will once again schedule Superintendent Conference Days during the course of the school year. A portion of our first Superintendent Conference Day will be devoted to the implementation of our Reopening Plan and making adjustments as necessary.
- D. **Employees Assistance Program:** We contract with Eastern Suffolk BOCES to provide mental health referral services for our staff and their families. In the event that a staff member begins to experience challenges with the job, family, etc., the EAP program is available to them and their immediate family.

XVIII. Teaching and Learning

- A. We will be sure to provide clear opportunities for equitable instruction for all our students.
- B. We will continue to follow the approved NYS Next Generation Learning Standards across all curriculum areas.
- C. If we are implementing the hybrid or virtual instructional model, we will ensure to deliver substantive daily interaction between teachers and students.
- D. We will communicate our plans for teaching and learning with all parents/guardians.

XIX. Personal Protection Equipment (PPE) and other Equipment

- A. **Masks:** We will encourage parents to send their children into school with their own mask, or face covering. We will have a supply of child-sized masks to distribute as needed.
- B. **Barriers:** If the need arises, we will install polycarbonate/acrylic dividers that will be positioned on individual student desks and table tops.
- C. **Temp Check Station:** During arrival of students and staff, we will use a scan thermometer to assess individual temperatures.
- D. **Disposable Gloves:** We will have a supply of these available for use as needed.

XX. Attendance/Chronic Absenteeism

- A. **Expectations for Student Attendance:** Our expectations for students to be "in school" following one of the instructional models (in-person or virtual) is no different than any other school year. We spend a great deal of time emphasizing the importance of being in attendance each and every day and work with our parents to realize this expectation.
- B. **Monitoring Student Attendance:** If a student begins to demonstrate signs of chronic absenteeism, we will contact the parents and work with them to improve the situation.

XXI. Accommodations for High-Risk Students

A. Response to Intervention (RtI): We have developed and implemented a very effective RtI program. The progress of each student academically, emotionally, and physically is regularly reviewed and monitored throughout the school year. The need to move students to Tier II and Tier III is discussed and acted upon as needed. We will continue to use our RtI program to identify and assist students who display high-risk behaviors and/or academic challenges.

XXII. Technology and Connectivity

 Connectivity: During the first few weeks of school, we will need to ascertain the level of connectivity that our students and their families have in their homes. If some families are lacking internet connections, then we will work to ensure that this is addressed. Once accomplished, we will move to implement our 1:1 initiative. 2. **Chromebooks:** We will issue a Chromebook to each student to keep at home and they will also have use of a Chromebook in the school. This will support the use of the same hardware in the home as in the school, creating a seamless opportunity for instruction to flow between the school and the home. Assignments, activities, and projects started in school can be worked on at home as the Chromebook remains constant. This will bode well if and when we may need to move to a virtual instructional model.

XXIII. Special Education

- 1. **The Benefits of a Small School**: Both of our classroom teachers are certified as elementary and special education teachers. As a result, our students benefit from working with teachers who have developed multiple skills in meeting the individual needs of children.
- 2. Response to Intervention (RtI): To classify a student for special education services, a school district must demonstrate that a child has worked through the RtI process. As mentioned in Section XXI. A., we have developed and implemented this required step in the classification process for special education services. We will continue to use our RtI program to identify and assist students who display high-risk behaviors and/or academic challenges.

XXIV. English Language Learners

 Contract for Services: Over the years, we have not had many students qualify for ENL/ESL services. Going forward, if we do, we will continue to follow all requirements as detailed in Part 154 of the Commissioner's Regulations. In addition, when needed, we contract for these services from neighboring school districts or Eastern Suffolk BOCES.

XXV. Teacher and Principal Evaluation

- 1. Annual Professional Performance Review (APPR)
 - a. **Teachers:** Over the years, we have developed a format that supports teacher reflection of the 22 essential components

- of the Danielson Model. Our intention is to follow our approved APPR plan for the 2021-22 school year.
- b. Principal: We have been successful in contracting with ES BOCES to bring a certified principal evaluator to our school to work with our principal through the Multi-Dimensional leadership rubric. Our plans will be to continue this arrangement.
- c. **Evaluation in a Fully Virtual Model:** We will need to develop protocols for conducting formal observations/visits of our teachers and our principal if/when we operate virtually.

XXVI. Teacher Certification

Members of the Sagaponack instructional staff hold valid and appropriate NYS certifications. We will continue our efforts to ensure that only highly-qualified individuals are working in our classrooms.

XXVII. Additional Health and Safety Items

A. **Signs of the Illness:** The signs of the illness associated with the CoVid-19 Corona Virus are as follows (See Appendix B: Signs of Illness):

Most Common:

Fever, dry cough, tiredness

Less Common:

Aches and pains, sore throat, diarrhea, conjunctivitis, headache, loss of taste and smell, rash on skin, or discoloration of fingers or toes

Serious:

Difficulty breathing or shortness of breath, chest pain or pressure, loss of speech or movement

B. Testing Requirements:

1. There are two types of testing: (1) diagnostic testing, which refers to the testing of symptomatic individuals or asymptomatic individuals exposed to a person with COVID-19 within the last 5 days; and (2) screening testing, which refers to the testing of asymptomatic individuals even if there is no reason to suspect infection.

- 2. Diagnostic Testing. Our school has the capacity (either through the distribution of over-the-counter antigen tests approved by the New York State Department of Health or Federal Government. or via referral) to provide diagnostic testing for any students, teachers, and staff who, regardless of vaccination status and community level of transmission per the CDC, are: Symptomatic; or Asymptomatic following exposure to someone with COVID-19.
- 3. Teachers and staff working in our school, are required to get tested once per week when a school is operating in a geographic area identified by the CDC has having low, moderate, substantial, or high transmission rates. Teachers and staff may be permitted to opt-out of mandatory weekly screening testing if they provide documentation of being fully vaccinated against COVID-19.
- 4. Our school will offer screening testing by referral to students once per week, with appropriate parent / guardian consent for minors, when such schools are operating in a geographic area identified by the CDC has having low, moderate, substantial, or high transmission rates.

C. Quarantine, Isolation and Return to School

- Any student or staff member who is presenting with COVID-19 exposure or symptoms will be sent home with instructions to contact their healthcare provider for assessment and testing. (A student will be placed in the isolation area and wait for a parent to pick them up. Parents will be advised to contact their healthcare provider for assessment and testing.)
- 2. The Sagaponack Common School District participates in a Board of Trustees approved Test to Stay Plan (see Appendix J), effective January 2022. Please see the plan for specific details in the addition to the information below.
- 3. A contact tracing log will be initiated as necessary. (See Appendix E: Contact Tracing Log)

- 4. According to CDC guidance, any staff member who is suspected to have close contact with someone who tests positive for COVID-19 should consider the following information:
 - a. Watch for fever of 100 degrees, cough, shortness of breath, or other symptoms of COVID-19.
 - b. If possible, stay away from others, especially people who are at higher risk for getting very sick from COVID-19.
 - c. Consult your healthcare provider if these symptoms persist.
 - d. Parents of students should follow the same guidance if symptoms persist with their children.
- 5. What constitutes close contact?
 - a. You are within three-six feet of someone who has COVID-19 for at least 15 minutes.
 - b. You provided care at home to someone who is sick with COVID-19.
 - c. You had direct physical contact with the person (touched, hugged, or kissed them.)
 - d. They sneezed, coughed, or somehow got respiratory droplets on you.
- 6. If a staff member or student tests positive for COVID-19, regardless of whether they are symptomatic or asymptomatic, they may return to school upon completing at least 5 days of isolation from the onset of symptoms or 5 days of isolation after the first positive test if they remain asymptomatic or with symptoms that are improving and are fever-free for at least 24 hours without the use of fever-free reducing medicines with the day of first symptoms or the day testing positive considered day 0.
- 7. If a staff member or student has had close or proximate contact with a person with COVID-19 for a prolonged period of time AND is experiencing COVID-19 related symptoms, the staff member or student may return to school upon completing at least 5 days of isolation from the onset of the symptoms, are fever-free for 24 hours without the use of fever-free medication and other symptoms have improved and present a negative COVID-19 test.

- 8. If a staff member or student has received all CDC recommended COVID-19 vaccine doses, including boosters, if eligible and additional primary shots for some immunocompromised people are administered, these individuals do not have to guarantine after close contact with someone that has COVID-19. Wear a well-fitted mask around others for 10 days from the date of last close contact with someone with COVID-19 and get tested at least 5 days after the date of the last close contact. If test is positive or COVID-19 symptoms develop, isolate from other people and follow isolation recommendations. Any individual who is not up-to-date on their COVID-19 vaccinations, is eligible for a CDC recommended booster shot, but has not received it, or is not vaccinated, must quarantine after close contact with someone with COVID-19. To quarantine, stay home and away from other people for at least 5 days (day 0 through day 5) after the date of the last contact with a person who has COVID-19, wear a well-fitted mask and watch for a fever, cough, shortness of breath or other COVID-19 symptoms for 10 days after the last close contact
- 9. If a student or staff member reports that they are positive for COVID-19, the Suffolk County Department of Health will advise who should also be notified, etc. (Call 311)

D. Proper Ventilation

- 1. In addition to the mechanical HVAC systems, whenever possible, windows throughout the school will be opened slightly to encourage additional circulation of fresh air.
- 2. We have purchased a mechanical upgrade to our HVAC system to include a HEPA filtration source.

E. Emergency Drills (Fire and Lockdowns):

All existing safety/emergency drills will continue with social distancing and PPE protocols in place.

XXVIII. Cleaning and Sanitizing

A. Cleaning of High-Touch Areas: Staff will be encouraged to wear disposable gloves at various times during the day in order to use

disinfectant wipes on high-touch areas. These include but are not limited to door knobs, desk/table tops, door push bars, etc.

B. Protocols for Cleaning and Disinfecting Schools:

- 1. Our custodian will use cleaning/disinfectant products that have been designed to be effective against the spread of COVID-19.
- 2. Each night, our custodian will conduct a cleaning protocol that will include all high-touch items/areas as well as a thorough cleaning/disinfectant of both restrooms. In addition, all floors will be either mopped with a cleaning/disinfectant product or vacuumed with a vacuum cleaner equipped with a HEPA filter.
- 3. On each weekend, the custodian will conduct a deep interior cleaning of the school. (See Appendix G: Daily Cleaning and Sanitizing Chart and See Appendix I: Safe Schools Program)
- C. Hand Sanitizers: Research has concluded that washing hands with soap and water for 20 seconds is the best way to carry out the protocol for proper hand hygiene. When this is not feasible, hand sanitizer units will be available in the school.
- D. **Physical Education Equipment:** Physical Education equipment will be cleaned in a similar manner prior to use.

XXIX. Before and/or After School Child Care Needs

- A. **Ascertain the Need:** Of the parents/families that we worked with last year, none expressed the need for child care. With the potential of a high number of new parents, the need for child care will be assessed once again.
- B. **Vendor:** If the need arises, we will direct our parents to contact the Eleanor Whitmore Early Childhood Center, located in East Hampton for possible enrollment.
- XXX. Practicing What We Know to Be Effective When Inside the School Building (As per the New York State American Academy of Pediatrics/Chapter 2 Representing 1500 Pediatricians from Suffolk, Nassau, Brooklyn, and Queens (See Appendix I.):
 - 1. Wear a Mask: All children and adults are required to wear masks when inside the school building except when masking would endanger breathing or mental health. Periodic "mask

- breaks" should be scheduled during the course of the school day.
- 2. **Maintain Distancing**: Consistent with New York State and Center for Disease Control (CDC) guidance, students, staff and teachers should maintain three feet of social distancing, whenever possible, to reduce viral spread.
- 3. **Hand Hygiene**: Opportunities for proper hand washing and/or hand sanitizing should be taken throughout the school day. Guidelines for hand washing should include washing for at least 20 seconds.
- 4. **Symptom Isolation**: Importance should be given to advising all students, staff, and teachers to stay home if exhibiting any symptoms of illness, especially fever. Parents should be aware of keeping children home from school in the presence of any symptoms as per the list found in Appendix B. Those who exhibit symptoms while at school should be isolated, go home, and consult their healthcare provider.

XXXI. Making Adjustments and Modifications Along the Way

We all recognize that addressing the impact of the COVID-19 is a work in progress. Changes in medical research; adjustments to procedural protocols, directives from the governor's office, the New York State Education Department, The New York State Department of Health, the Suffolk County Department of Health, and the Centers for Disease Control can be expected as we implement our reopening plans and such changes will be put into effect and implemented in the Reopening Plan as required. Patience, flexibility, and understanding will be the keys to our success in the long run. We look forward to working together to ensure children are safe and that effective learning takes place, whether we are using an in-person or virtual instructional model. Please feel free to contact us with your questions or concerns. Stay safe and be well.

HOW TO WEAR CLOTH FACE COVERINGS

Wear your face covering correctly:

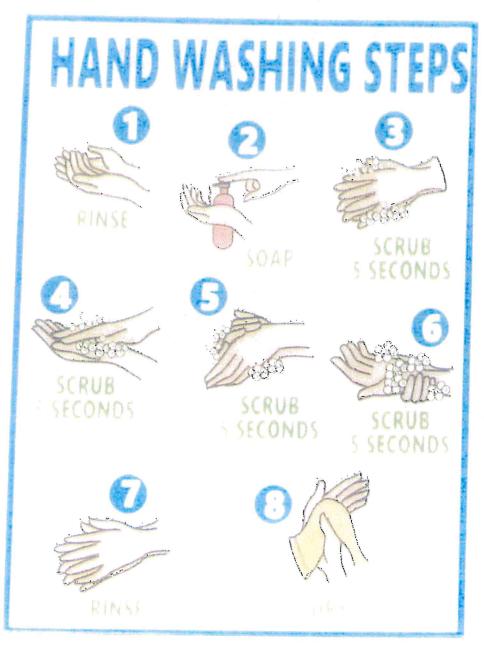

- Wash your hands before putting on your face covering
- Put it over your nose and mouth and secure it under your chin
- Try to fit it snugly against the sides of your face
- Make sure you can breathe easily

Use the face covering to protect others:

- Wear a face covering to help protect others in case you're infected but don't have symptoms
- Wear the covering in public settings when around people outside of your household, especially when other social distance measures are difficult to maintain
- Don't put the covering around your neck or up on your forehead
- Don't touch the face covering and if you do, wash your hands

Take off your cloth face covering carefully, when you're home:

- Until the strings behind your head or stretch the ear loops
- Handle only by the ear loops or ties
- Fold outside corners together
- Place covering in the washing machine
- Be careful not to touch your eyes, nose, and mouth when removing and wash hands immediately after removing

Stay germ free and healthy

When you're unable to social distance (& feet apart). a face covering is essential.

How to properly wear a face covering

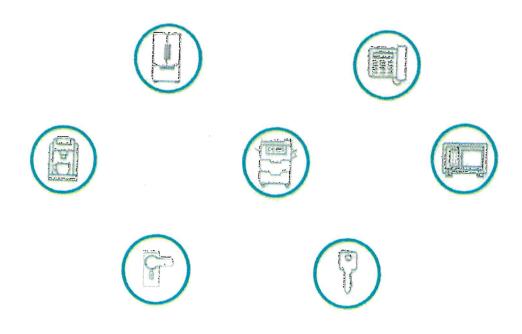

Thank you for helping to keep everyone safe!

Minimize exposure and keep yourself and others safe:

How many surfaces do you touch everyday?

Stay Home, Stay Safe

Not feeling well? It's OK to STAY HOME

Feeling under the weather at work? It's OK to GO HOME.

- Let your supervisor know if you're not feeling well and need to stay home or return home.
- Talk to your supervisor about working from home if you've been exposed or infected.
- Contact Human Resources if you have any questions regarding sick time.

Your coworkers will THANK YOU.

Instead of keeping your friends close, keep them safe

Use technology to safely connect with your coworkers in meaningful ways:

Telephone

Virtual meetings

Handwritten notes

Save in-person meetings for essential conversations, and don't forget to wear your face covering

Maintain & feet of distance between yourself and your colleagues

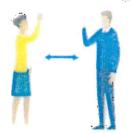

Wait in line to enter the building or use a shared piece of equipment

Don't crowd restrooms

Greet safely Without touching

Wear a face covering when sharing an elevator

NOTICE TO ALL EMPLOYEES, PARENTS, VISITORS, VENDORS AND GUESTS

We are committed to the health and well-being of all who enter our building. In view of the novel COVID-19 outbreak, we are taking precautionary measures to keep the workplace safe for everyone.

Please help us maintain a safe environment by attesting to the following statements:

Statement # 1- I am feeling healthy and well today.

- **Statement #2-** Within the last 10 days, I have not been in close contact with anyone who has been diagnosed with COVID-19.
- Statement #3- Within the last 10 days, I have not tested positive for COVID-19 nor have I been diagnosed as COVID-19 positive by a healthcare provider.
- Statement # 4- I am not presently required to quarantine due to New York State travel advisories.

Sign of Illness

Prior to the start of school, staff will participate in a Superintendent's Conference Day where they will meet with the school nurse from their building to learn how to recognize the signs of illness and the necessary steps to take should any student, staff or faculty member present with signs of illness.

Staff will be educated to observe the symptoms of illness:

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- · Muscle or body aches
- Headache
- New loss of taste or smell
- · Sore throat
- Congestion or runny nose
- · Nausea or vomiting

Additionally, staff will be educated to observe students or other staff members for signs of any type of illness such as:

- Flushed cheeks
- Rapid or difficulty breathing (without recent physical activity)
- Frequent use of the bathroom.

Students and staff exhibiting these signs with no other explanation for them will be sent to the health office for an assessment by the school nurse. Procedures outlined in the Core Health and Safety Principles.

Interim Guidance for Public and Private Employees Returning to Work Following COVID-19 Infection or Exposure

Purpose

This interim guidance is intended to inform employers as restrictions on private and public sector activities are scaled back in different regions of the state throughout the COVID-19 public health emergency. This guidance is not intended for health care or nursing home professionals, which have separate protocols and guidance for staff to return to work. Specifically, this guidance provides protocols and policies for employees seeking to return to work after a suspected or confirmed case of COVID-19 or after the employee had close or proximate contact with a person with COVID-19.

Background

On March 7, 2020, Governor Andrew M. Cuomo issued Executive Order 202, declaring a state of emergency in response to COVID-19 as community transmission of the virus occurred throughout New York. To minimize further spread, social distancing of at least six feet must be maintained between individuals, where possible.

On March 20, 2020, Governor Cuomo issued Executive Order 202.6, directing all non-essential businesses to close in-office personnel functions. Essential businesses, as defined by Empire State Development Corporation (ESD) guidance, were not subject to the in-person restriction, but were, however, directed to comply with the guidance and directives for maintaining a clean and safe work environment issued by the New York State Department of Health (DOH).

On April 26, 2020, Governor Cuomo announced a phased approach to reopen industries and businesses in New York in phases based upon a data-driven, regional analysis. On May 4, 2020, the Governor provided that the regional analysis would consider several public health factors, including new COVID-19 infections, as well as health care system, diagnostic testing, and contact tracing capacity. On May 11, 2020, Governor Cuomo announced that the first phase of reopening would begin on May 15, 2020 in several regions of New York, based upon the previously identified regional metrics and indicators. On May 29, 2020, Governor Cuomo announced that the second phase of reopening would begin in several regions of New York.

Return to Work

As employers slowly begin to return employees back to the workplace, diligence must be paid to the health and safety of employees, especially for those employees that previously tested positive for COVID-19 or had close or proximate contact with a person with COVID-19 for a prolonged period of time.

Employers and employees should take the following actions related to COVID-19 symptoms or exposure:

If an employee tests positive for COVID-19, regardless of whether the employee is symptomatic or asymptomatic, the employee may return to work upon completing at least 10 days of isolation from the onset of symptoms or 10 days of isolation after the first positive test if they remain asymptomatic.

- If an employee has had close or proximate contact with a person with COVID-19 for a prolonged period of time AND is experiencing COVID-19 related symptoms, the employee may return to work upon completing at least 10 days of isolation from the onset of symptoms.
 - o The New York State Department of Health considers a close contact to be someone who was within 6 feet of an infected person for at least 10 minutes starting from 48 hours before illness onset until the time the person was isolated. The local health department should be contacted if the extent of contact between an individual and a person suspected or confirmed to have COVID-19 is unclear.
- If an employee has had close or proximate contact with a person with COVID-19 for a prolonged period of time AND is <u>not</u> experiencing COVID-19 related symptoms, the employee may return to work upon completing 14 days of self-quarantine.
 - o However, if such an employee is deemed essential and critical for the operation or safety of the workplace, upon a documented determination by their supervisor and a human resources (HR) representative in consultation with appropriate state and local health authorities, the exposed, asymptomatic employee may return to work so long as the employee adheres to the following practices prior to and during their work shift, which should be monitored and documented by the employer and employee:
 - Regular monitoring: The employee must self-monitor for a temperature greater than or equal to 100.0 degrees Fahrenheit every 12 hours and symptoms consistent with COVID-19 under the supervision of their employer's occupational health program.
 - 2. Wear a mask: The employee must wear a face mask at all times while in the workplace for 14 days after last exposure.
 - 3. Social distance: The employee must continue social distancing practices, including maintaining, at least, six feet of distance from others.
 - Clean and disinfect workspaces: The employer must continue to regularly clean and disinfect all areas, such as offices, bathrooms, common areas, and shared electronic equipment.
 - Maintain quarantine: The employee must continue to self-quarantine and selfmonitor for temperature and symptoms when not at the workplace for 14 days after last exposure.
- If an employee is symptomatic upon arrival at work or becomes sick with COVID-19 symptoms while at the workplace, absent close or proximate contact with a person with COVID-19, the employee must be separated and sent home immediately and may return to work upon completing at least 10 days of isolation from the onset of symptoms OR upon receipt of a negative COVID-19 test result.

July 29, 2020

The New York State American Academy of Pediatrics - Chapter 2, representing 1,500 pediatricians from Suffolk, Nassau, Brooklyn and Queens, strongly support the return of students to school and in-person education. However, this must be done with the utmost attention to the safety of students, teachers, and staff. In accordance with the guidelines set forth by New York State, the Centers for Disease Control, and the national American Academy of Pediatrics, it is imperative that local epidemiology and rates of local cases of SARS-CoV-2 inform decisions about school re-entry and continued school attendance throughout the early part of the school year. Specifically, a universal masking policy, adherence to distancing guidance with the use of needed barriers, limiting school populations to reduce the chance of spread, strict attention to hand hygiene, symptom isolation, and access to widespread testing policies are needed to reduce the burden of COVID-19 in schools and communities and prevent outbreaks.

Local school districts have been given the task of creating specific plans for the safe return of students, faculty, and staff in the safest manner possible, and we believe these policies will assist that effort:

Universal Mask Policy

All children and adults in the school should be required to wear masks at all times except when masking would endanger breathing or mental health. Consistent with American Academy of Pediatrics guidelines, only children with rare, severe respiratory illness should be excluded from masking. This would not include most children with common respiratory conditions such as asthma. Threats to mental health would apply to children with sensory issues or developmental delays for whom wearing a mask could cause extreme anxiety. Types of masks may vary. We understand some parents, teachers and staff have expressed concerns with respect to wearing a mask throughout the day. Mask wearing takes some effort to get used to, but with time and patience it can be accomplished.

Further guidelines specific to proper use of masks, periodic 'mask breaks' during the course of the school day and desensitizing mask-related anxiety will be coming from local pediatricians in your area. To build tolerance for wearing a mask, we recommend children practice wearing masks during the weeks leading up to the start of school. Further guidance to help increase mask endurance and reduce mask anxiety should be discussed with your local health care provider. School Districts may also wish to provide messaging and assistance toward this effort.

Maintaining Distancing

Consistent with New York State guidance, students, staff, and teachers should maintain 6 feet of social distancing, whenever possible, to ensure the reduction of viral spread via respiratory droplets. Using physical barriers wherever possible also mitigates viral spread. Allowing smaller groups of children in the schools at one time, and using the model of smaller grouped cohorts would still further reduce the risk of spread. Alternating school attendance by specific grouped cohorts of students on certain days of the week may be helpful in schools that cannot allow full return on all days because of inability to physically distance. Deep cleaning between each cohort group attending school would also reduce exposure. Social distancing and masking should also be implemented during bus transportation.

Hand Hygiene

Multiple areas of hand washing and/or hand sanitizing must be available. Guidelines for hand washing should include washing for at least 20 seconds. Hand washing prior to eating, removal of masks, or any other activity, is important to stress. Schools should employ messaging, education and guidance regarding the importance of proper hand washing in the prevention of the spread of SARS-CoV-2 and other illnesses like influenza and gastroenteritis, that are commonly spread in a school setting.

Symptom Isolation and Access to SARS-CoV-2 Testing

Importance should be given to advising all students, staff and teachers to stay home if exhibiting any symptoms of illness, especially fever. Parents should be aware of keeping children home in the presence of any of the symptoms listed in the NYS guidelines. Symptomatic students must be isolated and must consult with their healthcare provider. Isolation of possible contacts must take place once a diagnosis of SARS-CoV-2 has been made. Accessibility to testing will be imperative to ensure the reduction of spread, and will provide information regarding local infection rates to guide further policy. When possible, schools should work in cooperation with local health departments to encourage and facilitate widespread testing of students however possible to provide the most accurate assessment of the incidence of SARS-CoV-2 in the community.

As per NYS guidelines, local health departments should assist in testing and isolation procedures after possible exposures. A contact of a person testing positive is defined as an individual who was within 6 feet for more than 10 minutes with the positive case. Duration of contact should be in accordance with local health department guidance. All guidance should be directed by the local health department and local health care personnel. Please follow state and local guidelines in preparation of schools for the return of students. As pediatricians, we would like to see the return of in person learning inside schools wherever possible, while also giving the utmost attention to the safety and health of all students, teachers, and staff.

Sincerely,

Shetal I. Shah MD FAAP

President, NYS AAP - Chapter 2

Sagaponack Common School District COVID -19 Test to Stay Plan January 2022

This written plan is in place to implement the New York State Department of Health and Suffolk County Department of Health Services ("SCDHS") guidance for Test to Stay ("TTS") TTS. This plan will be available for SCDHS review upon request.

This plan applies to District employees and students and is intended to avoid school exclusion (but not other restrictions of quarantine) of asymptomatic school-based close contacts who are otherwise subject to quarantine following exposure to COVID-19.

In order for an individual to be permitted to remain in school using TTS, all of the following requirements must be met:

- 1. **Qualifying School Exposure:** The exposure must have occurred in the school setting and while both the person with COVID-19 (index patient) and exposed person were consistently and properly masked. The determination whether this requirement has been met will be made by Mr. Terry Scammell or Mrs. Katie Lombardo, in their sole discretion.
- 2. **Asymptomatic:** The exposed person must remain asymptomatic. If the exposed person who is allowed to remain in school through TTS develops symptoms, they will be immediately excluded from school per current District/school guidance. If at any point during this period, your child (if a student) or you (if an employee) develop symptoms, do not come to school.
- 3. **Required Minimum Testing Sequence:** The exposed person must be tested a minimum of two times within five days and three times within seven-days following exposure, unless recognition of the exposure is delayed or weekends or school breaks intervene. *The seven-day period is measured in calendar days where the last date of exposure is considered day 0. The first test will be done as soon as possible after exposure is identified (i.e., the first day the student is in school after identified exposure).

The required minimum testing regimen will be as follows which may be modified as necessary:

Minimum Testing Cadences					
Day of First Test	Day of Second Test	Day of Third Test			
0	2 or 3	5, 6, or 7			
1	3	5, 6, or 7			
2	4	5, 6, or 7			
3	5, 6, or 7	NA			
4	5, 6, or 7	NA			
5	6 or 7	NA			
6	NA	NA			
7	NA	NA			

Adjustments may be made to account for weekends and other non-school days, in which case a test must be conducted on the first school day back and continue thereafter according to the above.

- 4. Timing of Test and Results: Tests must be conducted—and the results received—before the school day begins. Positive individuals must be excluded from school and isolated per existing procedures. Test results must be emailed or dropped off to Mrs. Jeanette Krempler, District Clerk. If an at-home over the counter test is administered a copy or photo of the test result matched with the student's name and date of the test along with the parent attestation form must be submitted to Mrs. Krempler as proof of a negative test before admitting the student into school. If the test is performed at an authorized testing facility, a copy of the negative test result must be submitted to Mrs. Krempler.
- 5. Use of At-Home / Over-the-Counter Tests: If the test is done in an unmonitored setting (e.g., at home using an over-the-counter, or OTC, rapid test) the parent/guardian is expected to administer the test on their child in accordance with the manufacturer's instructions provided in the OTC test.
- 6. **Participation in the Test To Stay Program:** To participate in the District's Test To Stay Program the parent/guardian must complete and sign the District's COVID-19 Test To Stay (TTS) Participation Consent Form by which the parent/guardian agrees to the student's participation in TTS, agrees to the conditions outlined above, and if District-administered testing will be used, for example, consents to the student's participation in same.

Equity Considerations:

It is the District's goal that where resources permit, families will not have to pay for the testing necessary to permit the student to remain in school under the TTS Plan. A family's inability to pay for testing will not prevent a student from being eligible for TTS. When a family is notified of school-based exposure and a student's eligibility for TTS, the District will identify available testing resources through the District or testing resources that may be available in the community.

Protocols for Follow-Up on Positive Test Results:

If a student tests positive for COVID-19 the student will be excluded from school and permitted to return to school per the recommendations from the Suffolk County Department of Health Services (SCDHS). Close contacts will be reported to the SCDHS for instructions on contact tracing.

Continued Quarantine Requirements:

In accordance with New York State Department of Health and SCDHS requirements, an exposed person who is allowed to remain in school through TTS <u>must be quarantined outside of school instruction/academic periods</u> (on weekends/holidays when the seven-day TTS period is still active, but no school test is required; after school/evenings; no community activities or extracurricular participation including clubs, sports, arts/performance activities, etc.).

Please note that students participating in TTS <u>are</u> allowed to continue to ride the school bus following all existing guidance, including required masking.

Reporting of Test Results:

The District will maintain reports of all tests and encourages staff and families to submit positive at-home test results to SCDHS via the Report At- Home COVID-19 Positive Test Result Portal that can be found at www.suffolkcountyny.gov/suffolkcovid. If a family does not have computer access, they can call 311 to report their positive at-home test result.

Sagaponack CSD Board of Trustees Adopted: 1/18/2022- Amended date: 2/15/22

NOTE: The Sagaponack Common School District's Reopening Plan and the Test-to-Stay Plan for the 2021-2022 school year both follow the requirements and guidance issued by the New York State Department of Health and the Suffolk County Department of Health. Modifications to both plans will immediately take effect (without Board of Trustees approval) consistent with changes made by the New York State Department of Health and the Suffolk County Department of Health.
